Unit -3

Population and Settlement

Learning Objectives

- To know about human races and their classification
- To learn about the different religions
- To know about the major languages
- To know about the favourable conditions for settlements
- To understand the rural and urban settlements
- To learn the classification of settlements

S30BR

Introduction

Population Geography is a study of demographic phenomena which includes natality, morality, growth rates etc., through both space and time. Increase or decrease in population indicates population distribution and growth. The study of movements and mobility of population is called migration.

The Races

Race has been defined as a biological grouping within the human species. The race is a group of people with more or less permanent distinguishing characteristics that are inherited. The most widely found human racial types are based on visual traits such as head shape, facial features nose shape, eye shape and colour, skin colour, stature, blood groups etc.,

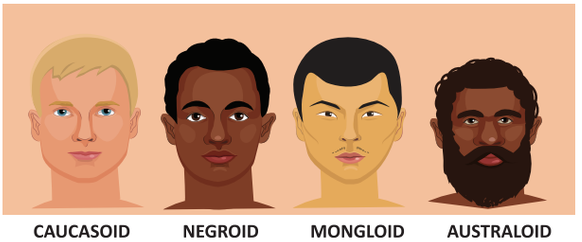

The major world human races are

- Caucasoid
- Negroid
- Mongoloid
- Australoid

NFTXQ

Caucasoid

The Caucasoid is known as European race. This group is the one with fair skin and dark brown eyes, wavy hair and narrow nose. The Caucasoid are also found in Eurasia.
