6.1 Introduction

In class VI we studied Sudoku which is a number puzzle. Now, we shall learn about ***"Tetromino".***

MATHEMATICS ALIVE – INFORMATION PROCESSING IN REAL LIFE

Creating shapes using Tertrominoes

Road routes

6.2 Tetromino

To know about tetromino, it is essential to have an idea about ***Domino and Trinomino.***

Join two squares of size 1cm x 1cm edge to edge. Such formation is called as ***Domino.*** When we arrange Domino either horizontally or vertically we get the following shapes ().

Similarly, when we join three squares along their edges we get the formation
