2. If the cost of a square tile is ₹ 52 then what will be the cost of the tiles that Raghavan buys for the front elevation? (see Fig. 6.22)

Fig 6.22

Solution

1.

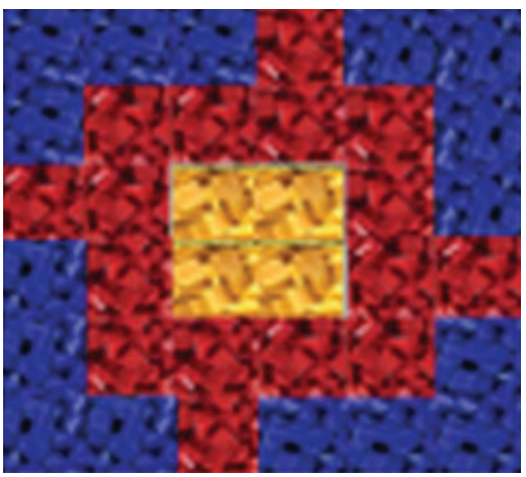

Fig 6.23

In one tile there are

= 1 tetromino

= 4 tetrominoes

= 4 tetrominoes

Therefore, there are nine tetrominoes in a tile.

2. Given, the cost of a tile is ₹ 52

There are six tiles in the front elevation

Therefore, the total cost = 6 × 52 = ₹ 312

Exercise 6.1

1. A tetromino is a shape obtained by ..... squares together.
2. Draw a tetromino which passes symmetry .....
