

Beach and Sand Bar

Lagoon is a shallow stretch of water partially or completely separated from the sea. E.g. Chilika lake in Odisha, Pulicat lake in Tamil Nadu and Vembanad lake in Kerala are the famous lagoons in India.

Lagoon

DO YOU KNOW?

The longest beach in the world is the **Miami beach** in South Florida in U.S.A. The second longest beach in the world is the **Marina beach** in Chennai.

Miami Beach

Summary

- The landscape is being continuously worn down by weathering and erosion.
- River, glacier, wind and sea waves are the major agents of exogenic forces.
- From its source to its mouth, the river is constantly reshaping the land and giving rise to different landforms.
- The river begins to break up into a number of streams called distributaries.
- Deltas are excellent productive lands.
- Glacier is large body of ice moving slowly down a slope due to gravity.
- Moraines are glacial deposits.
- Wind is the active agent of erosion and deposition in deserts.
- The sea waves deposit sediments of sand and gravel along the shores forming beaches.

Glossary		
Gradation	The process of leveling of highlands through erosion and filling up of lowland through deposition.	சமநிலைப் படுத்துதல்
Weathering	Breaking and crumbling up of rocks on the earth's surface.	வானிலைச் சிதைவு
River mouth	The place where the river joins a lake or an ocean.	ஆற்று முகத்துவாரம்
Tributary	A stream or river that flow into and joins a main river.	துணை ஆறு
Meander	Twists and turns forming large bends in the river.	ஆற்று வளைவு
Delta	Large Fan shaped sediments formed by river deposition	டெல்டா
Cirque	The arm chair shaped depression with steep sleep sided wall formed by glacial erosion.	சர்க்
Barchans	The crescent shaped sand dunes.	பிறைவடிவ மணற்குன்று
Lagoon	A shallow stretch of water partially separated from the sea.	காயல்
